

MESMER™ Counter Drone Solution Sale to South East Asia Based Customer

Highlights:

- First sale of MESMER™ counter drone solution into the Asia region
- Increasing sales momentum following Asia Pacific marketing roadshow

PERTH, WA and COLUMBIA, MD USA – DEPARTMENT 13 INTERNATIONAL LTD (ASX : D13) (“Department 13”, “D13” or “the Company”) a cutting edge developer of counter drone technology, is pleased to announce a sale of its MESMER™ counter drone solution to a South East Asian customer.

The solution sale comprises proprietary MESMER™ hardware and software enabling the end customer to secure its airspace by safely controlling the outcome of a drone engagement.

MESMER™ hardware and first year software licenses are priced upwards of US\$275,000 per unit, depending upon configuration and enhanced capabilities with recurring annual license fees.

The end customer selected MESMER™ following a series of demonstrations around Department 13’s participation at the Milipol International Exhibition of Homeland Security during April.

Department 13 CEO, Jonathan Hunter, commented:

“This initial Mesmer sales contract with the Asia-based company represents a beachhead in our strategy to penetrate the Asian counter drone market. Following the commercial release of our counter drone solution in January, our aggressive marketing program across the Asia Pacific region is beginning to deliver strong sales results and we are confident of continuing to convert our growing pipeline of opportunities.”

This end customer’s details and commercial terms remain in security in confidence.

About Department 13

Based in Maryland, Department 13 (D13) was founded in 2010 by a team of former military operators, scientists and engineers who apply proprietary innovative advanced technology to emerging requirements. D13 is developing cutting-edge software and communication systems that have the potential to transform the networking and communication fields as well as current applications in drone defense, mobile phone IT security and secure enhanced Android phone systems. D13 is engaged with multiple counter UAS projects to provide strategic solutions for civil, military and commercial security requirements. D13 has 14 patents and 23 patent applications in the development of wireless protocol manipulation and communication networking software with applications in drone defense, local area and wide area cellular communications and networking, enhanced data bandwidth for all digital communications, cyber security for mobile devices and sophisticated RF technology applications (radiometrics).
